

revital U Smart Caps Ingredients

Ingredients

Alpha-Glyceryl Phosphoryl Choline

Recognized as a safe and healthy natural choline ingredient, Alpha-GPC encourages brain alertness and memory function. It is also a critical nutrient for muscle tone and helps with body shaping.*

Alpha GPC is a water-soluble choline ingredient. Choline is important in growth and early development, and beyond those stages, it is important for optimal functioning of our brain and liver. The composition is similar to that of B-vitamins. Most people report greater mental clarity and the ability to learn new things increases. It is generally held that 90 percent of the population does not get recommended daily allowance of choline through dietary sources. This basically means almost every person you pass on the street is likely a candidate who could benefit from using Alpha GPC.*

Black Pepper Extract

Provides a standardized rich concentration of piperine, a naturally occurring active compound in black pepper used primarily to increase bioavailability for optimum absorption and to get more benefit out of supplementation. Black pepper is also known for boosting metabolism and reducing oxidative stress.*

Chromium Polynicotinate

Most of us aren't getting enough chromium due to the lack of it in our soil and water. Many of us also have a diet high in processed foods, white flour and junk food. Chromium regulates insulin, which helps reduce sugar and carbohydrate cravings.*

Chromium polynicotinate has been shown to possess high biological activity. Chromium is a mineral required for regulation of blood sugar. It is involved in the metabolism of glucose and is essential for energy and weight management.*

Green Coffee Bean Extract/Natural Caffeine

Natural caffeine from green coffee beans is known for its energy enhancing and thermogenic effects thereby increasing metabolism to assist in weight management, enhancing mood and maintaining energy to support increased activity level.*

Caffeine is the most recognized ingredient associated with coffee. It's a natural occurring stimulant found within the coffee bean. Over the last few years, many positive health benefits of caffeine have been identified, such as providing more energy, sharper memory, increased athletic performance and longevity.*

Juglans Regia Bark Extract

An isomer, which is closely related to Octodrine, has been included in the formula to get the “full-spectrum” effect of nootropic ingredients. With a different nutritional structure, this extract works in harmony with Octodrine to greatly increase and sustain the nootropic effect.*

L -Theanine

Known as the "feel-good" amino acid, science shows that L-Theanine provides and assists with the calming effects on the brain, by nutritionally increasing the levels of serotonin and dopamine. It naturally provides a relief from anxiety and stress, which is a common cause for overeating and weight gain. L-Theanine is thought to weaken the negative side effects of caffeine. It's often used as part of a stack, "Caffeine plus L-Theanine" and is one of the world's most popular nootropic stacks. L-Theanine is an amino acid that purportedly provides assistance with stress and anxiety. The amino acid is derived from tea leaves. L-Theanine is not common in a standard diet - which is why most us get our L-Theanine content from supplements and our diet (it's found in green tea, for example).*

L-Tyrosine

An amino acid used by human cells to synthesize proteins, L-tyrosine is a precursor to neurotransmitters and helps boost noradrenaline and dopamine to increase focus, energy and mood. It occurs naturally in high protein foods such as chicken, fish, almonds, pumpkin seeds and sesame seeds. It is used for anxiety, stress, memory preservation, mood and concentration.*

Nettle Root Extract

Protecting the cell membrane structure and keeping cholesterol in balance is an important step in maintaining good health. The Nettle Root Extract is a plant based herbal extraction that aids with retaining healthy blood sugar levels.

This ancient herb assists and supports the body in maintaining good cholesterol by influencing how the body responds to sugar and nutritionally balances the cholesterol ratio.*

Niacin (Niacinamide)

An essential human nutrient and a form of B-vitamin (B3) that has been associated with heart health and healthy cholesterol levels. It is also used to aid in energy metabolism, nervous system support and nutrient absorption. This form does not cause a niacin flush.*

Octodrine

This ingredient is believed to be effective in the breakdown of fat cells and weight management. Containing beneficial properties, octodrine may effectively help boost and support the body through a natural balancing process of various metabolic functions.*

It is also believed to enable anabolic response, which may help burn fat and control weight. Additionally, it may improve athletic performance and help improve mental focus and clarity.*

Octopamine

When you increase the body's metabolism, it results in helping the body burn calories and in the loss of body weight. Octopamine, which is found naturally in various foods, provides support and activity in fat metabolism.*

It may also stimulate Beta-3 Adrenergic Receptor, which is responsible for lipolysis (fat breakdown), and thermogenesis (fat burning).*

OmniMin™ AC

Specially formulated trace mineral blend of sea minerals that can be missing in standard diets. The trace minerals assist in healthy cellular function, nutrient uptake and energy.*

PEA (Phenylethylamine HCL)

Found in the plant kingdom, this ingredient functions as a neurotransmitter for the internal body communication providing the road for a better balanced system.*

Originally found in chocolate, it supports and promotes the feeling of fullness and satisfaction. Additionally, it stimulates neurotransmitters by releasing dopamine, improves mood, and increases alertness, focus and concentration.*

Vinitrox™ (Fruit Extracts)

A combination of apple and grape extracts that produce a synergistic effect to increase Nitric Oxide levels in the body for healthy blood vessels, circulation and blood flow. It helps enhance performance and increases endurance. Vinitrox is also a powerful antioxidant.*

Good Manufacturing Practices:

All revital U products are US manufactured. To meet our high standard requirements, all facilities follow strict FDA and NSF regulations, as well as the classification seal of cGMP. From start to finish, each product is carefully crafted and the highest rated ingredients are selected, to assure we provide you with purity in every cup!

Supplement Facts			
Serving Size 1 Capsule			
Servings 30 Per Pack			
Amount Per Serving	%DV†	Amount Per Serving	%DV†
SMART CAPS BLEND	575 mg	†	
Coffee Extract, L-Tyrosine, L-Theanine, PEA (Phenylethylamine HCL), VINITROX™ (Apple & Grape Polyphenols), Octodrine, Alpha-Glyceryl Phosphoryl Choline (A-GPC), Juglans Regia Bark Extract, Nettle Root Extract, Octopamine.			
		Max Bioavailability Blend	30 mg †
		Omnimin AC Trace Minerals, Black Pepper Extract	
		Niacin (Niacinamide)	20 mg 100%
		Chromium	200 mcg 167%
		(As Chromium Polynicotinate)	

† Daily Value not established. Product contains 150 mg of natural caffeine derived from Green Coffee Bean Extract. Other Ingredients: HPMC (vegetable capsule), Calcium Silicate. All trademarks are property of their respective owners.

WARNING: KEEP OUT OF REACH OF CHILDREN. Use only as directed. DO NOT exceed recommended serving, it will not improve results. Not intended for use by persons under age 18, pregnant or nursing women. Consult your doctor before use if you have a medical condition and/or taking prescription medication. DO NOT use this product if you are at risk or being treated for high blood pressure, heart, kidney, thyroid or psychiatric disease, anxiety, depression, seizure disorders or stroke. Discontinue use and consult your doctor immediately if you experience any adverse symptoms. Not WADA compliant.
